

Tyler Wotring – National White Collar Crime Center (NW3C)

As Director of Cyber Forensics, Tyler is responsible for overseeing and implementing activities that effectively support NW3C, its services, and its initiatives. He oversees the planning, assigning, and directing of work as well as appraising complaints and provides subject matter expertise and technical assistance in the field of cyber forensics. Tyler manages a vast array of personnel located across the United States. Prior to being a director, he held supervisory and training positions within the cyber crimes section. Tyler provided thousands of hours of training to thousands of State, Local, and Federal law enforcement personnel in data recovery and analysis. The topics range from basic seizing and identifying items of electronic evidence, to the analysis of artefacts found in a variety of file systems and operating systems in both Windows and Mac environments, mobile environments including IOS and Android, as well as through online open source intelligence gathering. He has additionally also provided technical assistance to law enforcement personnel on cyber forensic topics on hundreds of cases. Tyler holds a Master's in business administration and a Bachelor's of science degree in forensic and investigative sciences from West Virginia University.

Tyler will be discussing identifying and seizing electronic evidence
